Medi-Infotec
The Medical Software People

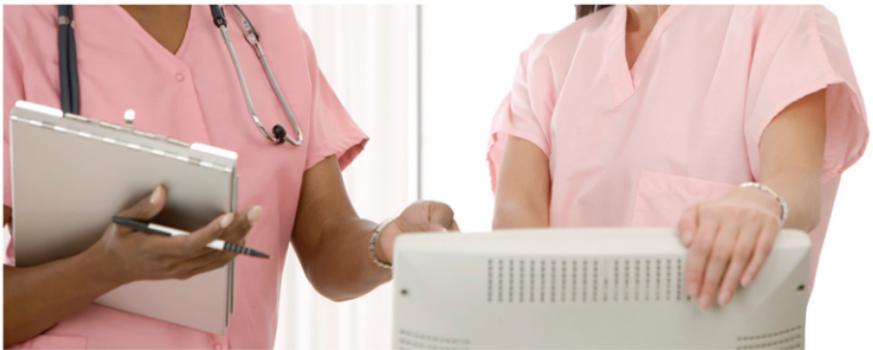

HIPPOCRATES
Developed by Medi-Infotec

Hippocrates enables full control of Hospital and improves quality, turnaround time and productivity, while continually reducing medical errors by raising necessary alerts - all through an integrated application. System custom designed to meet process and provide real automation thereby reducing manpower. All in all Improves Patient Safety and Eliminates process delays

Helps improve the flow of information across various departments, teams and people

System helps focus on Critical Patients by necessary color coded alerts, thereby enabling focused treatment

Electronic Medical Records together with Radiology and Laboratory Clinical Modules, enables storage of all clinical data for each particular patient. Collecting data on any patient visit makes a complete patient medical history available to healthcare providers. Thus the quality and efficiency of patient care is improved.
